

## Practice for Professionals

**Rexroth**  
Bosch Group

Service  
Automation

**Rexroth**  
Bosch Group

The "Practice for Professionals" training manuals contain exercises corresponding to BiBB as well as additional exercises for consolidating individual topics. The trainer's manual has a sample design drawing for every exercise to assist positioning of the device in a training and exercise system, as well as solutions and didactic notes on the relevant task.

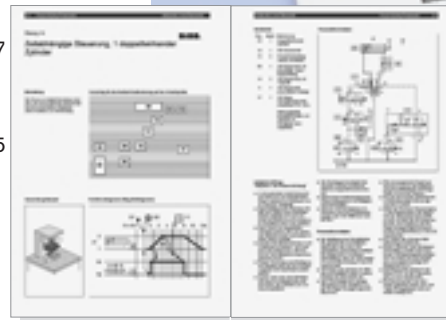

### Practice for Professionals Pneumatics (BiBB+)

**Contents:**  
16 BiBB exercises  
+ 4 additional exercises

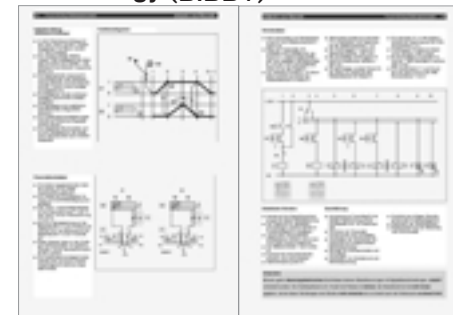

**Products:**

ISBN 3-933698-22-7  
Trainer's Manual  
£ 12.50 incl. VAT.

ISBN 3-933698-23-5  
Trainee's Manual  
£ 7.50 incl. VAT.

### Practice for Professionals Electropneumatics/PLC/ Closed Loop Control Technology (BiBB+)

**Contents:**  
15 BiBB exercises  
+ 9 additional exercises

**Products:**  
ISBN 3-933698-26-X  
Trainer's Manual  
£ 12.50 incl. VAT.

ISBN 3-933698-27-8  
Trainee's Manual  
£ 7.50 incl. VAT.

## WBT/e-Learning

### Interactive Training Software from the WebTr@iner Series

The programs of the WebTr@iner Series are multimedia-designed. The selection and targeted use of multimedia elements in combination with exercises in "Virtual Reality" contributes greatly towards stimulating motivation of the students, thus helping to achieve sustained transfer of knowledge.

The WebTr@iners are suitable both for higher and further education and can be installed on individual PCs as well as on training networks in educational institutions and in industry.

#### WebTr@iner Characteristics and Highlights:

Easy installation with WIN 98, WIN 2000, WIN XP; both for individual computers and web servers; intuitive operating; context-orientated help; interactive exercises and tests; conformity to AICC; HTML-based;

The media used in the WebTr@iner are also available separately for easy incorporation into a digital teaching materials.

## WBT/e-Learning

### WebTr@iner for Fieldbus Systems

The WebTr@iner supplies answers to the questions:  
What is a fieldbus?  
How does it work?  
How do they differ?  
How do I install them?

#### Product:

1 070 083 022  
WebTr@iner Bus Systems V1.0

Languages de/en/es

Price per individual licence\*:  
£ 107.30 incl. VAT.

### WebTr@iner for Hydraulics and Pneumatics

These WebTr@iners supply answers to the questions:  
What are the components?  
How do they work? What tasks do they fulfil within the system?  
What are their applications?

#### WebTr@iner Products:

1 070 083 001  
Basic Hydraulics V 3.1

1 070 083 004  
Electrohydraulics V 3.1

1 070 083 020  
Proportional and Control Hydraulics V 3.1

1 070 083 007  
Basic Pneumatics V 3.1

1 070 083 010  
Pneumatic Systems V 3.1

Languages de/en/es

Price per individual licence \* and product:  
£ 143.55 incl. VAT.

(\*Licences for educational institutions and companies on request)

### WebTr@iner Media on CD-ROM

Separate media modules (e.g. videos, VRMLs, experiments u.a.) from the WebTr@iners for incorporation into your own didactic concepts.

#### Product:

1 070 087 611 BUSmedia  
(Media from 1 070 083 022)

Languages de/en/es

Price per classroom licence\*:  
£ 353.75 incl. VAT.

#### Products:

1 070 083 070 HYmedia/1  
(Media from 1 070 083 001)

1 070 083 071 HYmedia/2  
(Media from 1 070 083 004)

1 070 083 072 HYmedia/3  
(Media from 1 070 083 020)

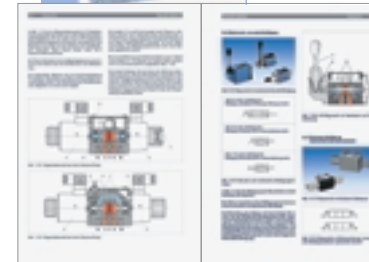

1 070 087 609 PNmedia/1  
(Media from 1 070 083 007)

1 070 087 610 PNmedia/2  
(Media from 1 070 083 010)

Languages de/en/es

Price per classroom licence\* and product:  
£ 487.50 incl. VAT.

## Books, Slides on CD

### Book Hydraulics - Basic Principles and Components

#### The Hydraulic Trainer Vol. 1 3rd Revised Edition

The success story of the manual "Hydraulics - Basic Principles and Components" began with the First Edition in 1978  
The Hydraulic Trainer Vol. 1 .

Since then this manual has accompanied many in their higher or further education, as well as being used for self-study and it is still used as an aid and reference book at the workplace.

The main emphasis of the revised version was on the updating of the individual topics and illustrations as well as the correction of circuit diagrams. For didactic reasons to make the pressure relationships more easily understandable, the colours used in the circuit diagrams were re-assigned.

#### Contents:

Basic Principles of Hydraulics, Symbols, Hydraulic Fluids, Hydraulic Pumps, Hydraulic Motors, Axial Piston Units, Hydraulic Cylinders, Swivel Drives, Hydraulic Accumulators, Check Valves, Directional Control Valves, Pressure Control Valves, Flow Control Valves, Filters, Accessories, Connection Technology, Hydraulic Drive Power Units, Subject Index.

#### Design:

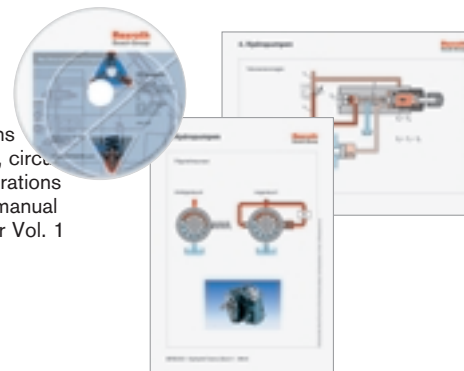

325 pages, colour  
Format 21x29.7 cm, Flexiband  
ISBN 3-933698-30-8

£ 30.00 incl. VAT

### CD-ROM HY1graphics

This CD-ROM contains approx. 400 drawings, circuit diagrams, colour illustrations and photos from the manual  
The Hydraulic Trainer Vol. 1

ISBN 3-933698-31-6  
£ 33.63  
incl. VAT

## Software

### Software for Simulation of Valve-controlled Cylinder Drives in Hydraulics HYVOS 6.4

Valve-controlled cylinder drives can be simulated in open and closed circuits using the HYVOS 6.4. It permits the modelling of any selected structures, motion sequences and loading conditions, as well as demonstrating transparently the complex interaction between hydraulics, electronics, closed loop control technology and sensor technology.

#### Product:

1 070 083 077  
HYVOS 6.4

Languages de/en

Price per individual licence\*:

£ 361.05 incl. VAT.

HYVOS 6.4 is suitable both for industrial applications in project design and development, as well as for training in hydraulic drive technology.
